

CUOMEI®-TA100

CUOMEI® TA100 anatase titanium dioxide whiteness of the product is good, consumption of high color strength, low oil absorption, particle size and particle size distribution well, the product of hiding and dispersion of all good, stable performance. Prestigious in the market, in short supply.

Widely used in plastics, color masterbatch, rubber, paint, paper and other fields.

Features

Whiteness, eliminating the high color strength, low oil absorption, particle size and size distribution is good, all good dispersion and hiding power

Key Indicators:

Items	Indicators
TiO ₂ content%	≥98
Color (with standard sample)	Not less than
Reducing power (compared with standard sample)	≥100
Oil Absorption%	≤21
45UM sieve residue%	≤0.03
PH value	6.5-8.5

Using the proposed:

- Plastic
- Masterbatch
- Ink
- Paper
