

# CUOMEI®-TA101

CUOMEI® TA101 anatase titanium dioxide used in the products of high purity titanium, with the leading process technology. And go through rigorous testing to ensure that each batch of finished products have to maintain superior quality and stable performance. Product has excellent optical properties and color performance, it is high purity, good whiteness, strong hiding power, elimination of high color strength and easy to spread.

Widely used in paints, coatings, plastics, masterbatches, rubber, ink, paper and other fields.

## Features

High purity, good whiteness, strong hiding power, elimination of high color strength and easy dispersion

## Key Indicators:

Items	Indicators
TiO2 content%	≥98
Color (with standard sample)	Not less than
Reducing power (compared with standard sample)	≥100
Oil Absorption%	≤20
45UM sieve residue%	≤0.03
PH value	6.5-8.5

## Using the proposed:

- Paint
- Rubber
- Plastic
- Masterbatch
- Ink
- Paper
